Model # 6X12HST

# LAZYMANS® SLIDE-TILT TRAILERS

## The Ideal Trailer for Landscapers

A 6° load angle makes loading equipment and recreational vehicles safe and easy.

### THE ONE TRAILER LANDSCAPERS CANNOT DO WITHOUT!

Providing 78 square feet of deck space, the Lazyman trailers allow ample room for mowers, rollers and other tools of the trade. A 12" rear gate and a unique 6° load angle allow easy loading and unloading, even for heavy equipment with limited ability to climb inclines. This design offers a much more gradual slope than the standard 12° angle found on most trailers, preventing strain on your back and protection against load shifting.

The **Standard 6X12ST** model can quickly and easily transition into the tilted position while hitched to your vehicle. Wheel chocks included with your trailer stabilize the axle, while your vehicle pushes the trailer deck back and into place. Reverse the operation to return the deck to the upright position. The **Deluxe 6X12HST** model features an electric hydraulic unit and cylinder which move the axle that in turn tilts the trailer bed, all at the touch of a button!

An optional custom rail-mounted toolbox or built-in on-board compartments can add to the versatility and storage capacity of this trailer. Or keep your trailer looking new by choosing the optional galvanized steel construction. This rugged construction is durable and easy to maintain, even when stored in an open environment.

Slide-Tilt trailers are also ideal for pavement rollers, manlifts, motorcycles, ATVs and snowmobiles.
